

Full Stack Engineer with 4+ years of experience building SaaS platforms, CRM systems, fleet management tools, workflow automation systems, and AI-powered applications. Skilled in React, Next.js, React Native, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, AWS, Docker, REST APIs, authentication, RBAC, and performance optimization.

Experienced in building production-ready applications end-to-end, including frontend architecture, backend APIs, database design, cloud deployment, API integrations, dashboards, automation workflows, and production support.

KEY SKILLS

- **Frontend:** React, Next.js, React Native, JavaScript, TypeScript, Tailwind CSS, Redux
- **Backend:** Node.js, Express.js, REST APIs, Microservices, WebSockets
- **Authentication & Security:** JWT, OAuth, OTP Authentication, RBAC
- **Databases:** MongoDB, PostgreSQL, Data Modeling, Query Optimization
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, SNS, SES, IAM), Docker, CI/CD
- **AI & Automation:** Gemini API, Operations Copilot, RAG Knowledge Base, Tool Registry, Tool Execution Layer, Prompt Engineering, Workflow Automation, Analytics Engine, Audit Logging
- **Tools & Testing:** Git, Postman, Jest, Unit Testing, Payment Gateway Integration, Shopify

PROFESSIONAL EXPERIENCE

Full Stack Developer | Yastudy (Remote)

07/2024 – 04/2026

- Built and deployed a **multi-tenant SaaS CRM** platform using React, Next.js, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, and AWS.
- Developed CRM modules for lead management, student onboarding, HR, LMS, application tracking, admin workflows, document management, and internal operations.
- Built secure **REST APIs**, **OTP** authentication, **JWT** authorization, **RBAC**, and role-based workflows for admins, counselors, students, HR teams, and internal users.
- Worked with MongoDB and PostgreSQL to design data models, optimize queries, and support dashboards handling **10 lakh+ records**.
- Implemented **AWS EC2, S3, Lambda, SNS, SES**, and **IAM** for deployment, file storage, notifications, emails, and workflow automation.
- Implemented **CI/CD** workflows for faster and more reliable deployments, including Git-based code management, build checks, environment-based releases, and deployment support across frontend and backend services.
- Built an **AI-powered** Operations Copilot using Gemini API, prompt engineering, **RAG**-based knowledge systems, tool execution workflows, analytics, and audit logging.
- Automated onboarding, notifications, document workflows, reporting, and internal follow-ups, reducing manual operational effort by approximately **60%**.
- Optimized backend APIs, database queries, and frontend rendering, reducing dashboard response times by nearly **40%**.
- Built reusable frontend components, dashboards, forms, filters, tables, modals, and role-based UI flows using React, Next.js, TypeScript, Redux, and Tailwind CSS.
- Mentored **3+ developers** through code reviews, debugging, technical guidance, and production issue resolution.

Frontend Developer | Fullfily (Bengaluru, India)

06/2023 – 05/2024

- Developed EV fleet management, rental, delivery, and operations platforms using React, Redux, JavaScript, REST APIs, and responsive frontend architecture.
- Built dashboards for vehicle tracking, rental workflows, delivery operations, fleet availability, role-based visibility, and operational reporting for **1,000+** vehicles.

- Built a **React Native** mobile app for Fullfily drivers, enabling driver-side task visibility, delivery workflows, status updates, and API-powered mobile interactions.
- Integrated frontend and mobile interfaces with backend REST APIs for fleet operations, driver workflows, rental management, delivery updates, and reporting.
- Improved UI consistency, optimized rendering performance, and improved dashboard responsiveness by approximately **35%**.
- Collaborated with backend, product, and operations teams to deliver production-ready features in **Agile** sprints.

Jr. React.js Developer | Verbinden Communication (Bengaluru, India)

11/2022 – 02/2023

- Developed marketplace features for buyers, sellers, vendors, and administrators using React.js, Redux, JavaScript, and **REST APIs**.
- Built reusable and responsive UI components for vendor onboarding, campaign management, marketplace workflows, and customer engagement modules.
- Integrated backend APIs and third-party services to support marketplace operations and business workflows.
- Improved frontend performance through efficient state management, reusable components, and optimized rendering.

Frontend Engineer | Droice Labs (Remote)

01/2022 – 09/2022

- Developed healthcare analytics and operational dashboards using **React.js**, **Redux**, JavaScript, and REST APIs.
- Built interfaces for patient, doctor, administrator, healthcare operations, analytics, reporting, and data visualization workflows.
- Developed reusable React components and improved frontend state management, rendering performance, UI consistency, and maintainability.
- Contributed to interfaces supporting **AI-assisted healthcare workflows** and **healthcare analytics accessibility**.

EDUCATION

Master of Science in Computer Science – St. Xavier's University (Kolkata)

2020 – 2022

Bachelor of Science in Computer Science – St. Xavier's College (Burdwan)

2017 – 2020
